

DOI Work Activity 7P:-Control Invasive Plants

Program Area:	Invasive Species
End Outcome Goal:	PEO 2 – Sustain Biological Communities on DOI Managed and Influenced Lands and Waters in a Manner Consistent with Obligations Regarding the Allocation and Use of Water
Intermediate Outcome:	This activity does not align to an intermediate outcome
DOI Sub process:	4d – Conserve resources (perform resource treatments)

Examples/Notes:

Work Activity Description: Includes all costs such as; systematic efforts to eradicate or contain a potentially invasive species introduced into an ecosystem while the infestation of the ecosystem is still localized.

Includes all costs associated with inventories and ongoing surveys to track the presence and status of invasive species over time and at varying landscape scales and to evaluate the effectiveness of prevention, control and restoration activities.

Control and management activities that minimize or prevent the spread of established invasive plant species from infested areas and initiate actions to prevent further introduction and spread. Includes all costs associated to plan for, assess, conduct eradication, build partnerships, conduct outreach and education efforts, limit dispersal, develop technologies and conduct research and development, suppression, or other management efforts.

Restoration costs include project planning and management, research, procurement/contracting of equipment, materials, seed, supplies, and services, field operations to implement treatments, monitoring and evaluation, and implementation of activity or resource management plans that will maintain the improvements.

This includes actions to: plan for and minimize the risks of invasive species introductions on public and private lands and waters; analysis, monitoring, research and evaluation of pathways and vectors for international and trans-regional movement of invasive species; development of treatment technologies; development of screening methodologies; evaluation and regulation of potentially injurious species, international coordination and information sharing and conducting education and outreach efforts.

Output: acres treated/restored	Unit of Measure: Number of Acres treated/restored
Inputs: All labor, travel costs, vehicle costs, contract costs, IPM treatments, purchase of equipment and materials, mapping, planning, compliance, research and development, technical assistance, information management and sharing	Cost Drivers:
